

DENIS BELEVTSOV

e-mail: denistrators@gmail.com

Remote, Odessa, Ukraine

// Senior Magento Frontend Architect | Hyvä Specialist | Performance Engineer
// 10+ Years Experience

01. Languages

Language proficiency

- **English** B2 — Upper Intermediate

CEFR Level B2 and TOEFL iBT 90 / 120

27.06.2026

- **Ukrainian** Native
- **Russian** Native

02. Skills

Know it, use it

Hyvä

- Hyvä Themes
- Alpine.js
- Tailwind CSS
- Hyvä UI
- Magewire

Magento 2

- XML Layouts
- Fallback / Inheritance system
- UI lib / Blank / Luma
- Custom modules development
- 3rd-party modules customisation
(Mirasvit, Amasty, Ubertheme, etc)
- PHP DI, Plugins ViewModels
- Widgets (widget.xml)
- UI components
- RequireJS / JS mixins
- Emails customisation
- Magento 1 (themes, modules)

Front-end:

- Accessibility / Semantic HTML5
- RTL Implementation
- jQuery / Knockout
- NPM / Grunt / Gulp
- SVG / Font Icons
- Pixel perfect
- Optimization for Google PageSpeed

Back-end:

- Composer
- PHP / PHP Debug / PHP DOM
(parsing & modifying html on server side)
- MySQL

Flow

- Docker / DDEV
- Git/GitHub Actions, CI/CD for Hyvä/Tailwind builds

Misc:

- Jira
- Semantic versioning / Keeping a changelog

03. Soft Skills

Professional Soft Skills

- **Technical Leadership & Mentorship**

Spearhead architectural direction and provide technical mentorship to elevate team capabilities in Hyvä, Alpine.js, and complex backend debugging.

- **Strategic Problem Solving**

Expert at auditing complex legacy systems, identifying deep-seated architectural bottlenecks, and prioritizing high-impact solutions to maximize business outcomes.

- **Stakeholder & Business Alignment**

Proven ability to translate complex technical metrics (Core Web Vitals, conversion rates) into clear business value for non-technical stakeholders.

- **Proactive Risk Mitigation**

Focus on engineering "upgrade-proof" systems and standardized architectures to prevent long-term technical debt and ensure stability during enterprise deployments.

- **Operational Efficiency**

Dedicated to optimizing development lifecycles by architecting boilerplates and reusable frameworks that accelerate onboarding and reduce project overhead.

- **Accessibility & Inclusive Design**

Champion for WCAG standards and inclusive user experiences, ensuring storefronts are accessible to all users through semantic HTML and rigorous compliance testing.

- **Cross-Functional Collaboration**

Effectively bridge the gap between technical infrastructure and marketing needs, empowering teams to manage sophisticated layouts independently.

- **Autonomous Project Ownership**

Demonstrate full-cycle accountability for enterprise-scale projects, from initial technical discovery and audit to final deployment and performance tuning.

- **Detail-Oriented Precision**

Committed to high-fidelity, pixel-perfect execution with an obsessive focus on performance stability and the total elimination of layout shifts.

- **Continuous Learning Mindset**

Committed to staying at the forefront of the Magento ecosystem, demonstrated by a successful 10-year track record of evolving from legacy Luma to modern Hyvä architectures.

04. Work Experience

Magento 2 Frontend Developer | 10+ Years Experience

- **Themes Architecture**

Architected reusable, high-performance Magento 2 parent-child theme structures and built a standardized theme library deployed across all company projects — ensuring scalability, code consistency, and rapid onboarding for new team members.

- **Module Ecosystem Management**

Spearheaded integration and deep customization of complex 3rd-party modules and themes, ensuring seamless compatibility with core business logic and frontend requirements — zero breaking changes across deployments.

- **Storefront Performance Optimization**

Directed Luma and Hyvä optimization strategies for 10+ enterprise projects, owning the full lifecycle from technical auditing and issue prioritization to module refactoring and 3rd-party widget performance tuning — delivering measurable improvements in Core Web Vitals.

- **Luma to Hyvä Migration**

Planned and executed the migration of Luma UI to Hyvä across multiple projects, tracking performance deltas throughout the process to validate improvements and ensure a smooth transition with zero downtime.

05. Achievements

Key results and contributions to projects

- **Performance Restoration**

Led the architectural overhaul of legacy Magento 2 installations, resolving deep-seated bottlenecks and modernizing outdated frontend stacks. Migrated 5+ Luma projects to Hyvä, pulling websites out of the "red" performance zone and into the "green" — measurable, sustained improvement.

- **Project Scale**

Delivered and managed the full lifecycle of 20+ Magento 2 storefronts — from greenfield builds to enterprise-level scaling. Each project tailored to specific business requirements while maintaining a consistent, reusable architecture.

- **Strategic Boilerplate Engineering**

Architected and maintained a suite of high-performance generic themes that became the primary foundation for all client projects — significantly accelerating time-to-market and reducing development overhead across the board.

- **Hyvä Technical Leadership**

Directed frontend architecture for Hyvä-based projects, providing technical direction and conducting comprehensive code reviews — establishing and enforcing modern performance standards across the team.

- **Compatibility Architecture**

Engineered Hyvä compatibility modules for complex 3rd-party extensions and successfully migrated internal legacy Luma modules to the Hyvä ecosystem — eliminating compatibility blockers and ensuring feature parity.

- **Checkout Specialization**

Executed high-complexity Checkout customizations, refactoring standard flows to support bespoke business logic — directly contributing to improved user conversion and reduced cart abandonment.

- **CMS Innovation**

Implemented advanced PageBuilder extensions and custom content types, empowering marketing teams to manage sophisticated layouts independently — eliminating developer bottleneck for content updates.

- **CLS Elimination**

Completely eliminated Cumulative Layout Shift across 8+ Luma projects during performance optimization — achieving stable, predictable rendering with zero layout

jumps on page load.
